

A heatmap visualization showing the maximum probability $\text{Max } P(\theta, L, \Gamma)$ across 10 particles (x-axis) and 10 iterations (y-axis). The color scale ranges from 0.00 (dark purple) to 0.30 (yellow). The plot shows a sparse distribution of high probability values, with the highest values (yellow) appearing at (Particle 4, Iteration 6) and (Particle 8, Iteration 4). The y-axis is labeled $\text{Max } P(\theta, L, \Gamma)$ and the x-axis is labeled **Particles**.

$$\text{Max } P(\theta, L, \Gamma)$$
