

A heatmap visualization showing the maximum probability $\text{Max } P(\theta, L, \Gamma)$ for 10 particles. The x-axis is labeled 'Particles' and ranges from 0 to 9. The y-axis is labeled ' $\text{Max } P(\theta, L, \Gamma)$ ' and ranges from 0.00 to 0.30. The color scale indicates the probability value, with darker purple representing 0.00 and lighter yellow representing 0.30. The heatmap shows a sparse distribution of high probability values (yellow and light green) across the 10 particles, with most values being near zero (dark purple).
