

A heatmap visualization showing the maximum probability $\text{Max } P(\theta, L, \Gamma)$ (Y-axis) as a function of the number of particles (X-axis, 0 to 8) and the number of iterations (Y-axis, 0 to 8). The color scale ranges from 0.00 (dark purple) to 0.30 (yellow). The plot shows a checkerboard-like pattern of high probability values (yellow/green) and low probability values (dark purple) across the iterations and particles.
