

A heatmap showing the maximum probability $\text{Max } P(\theta, L, \Gamma)$ for different numbers of particles (0 to 10) and different values of L (0 to 10). The color scale ranges from 0.00 (dark purple) to 0.30 (yellow). The highest values are concentrated in the top-left corner, indicating that the maximum probability is highest for low particle counts and low values of L .
