

A heatmap visualization showing the maximum probability  $\text{Max } P(\theta, L, \Gamma)$  for 10 particles (x-axis) and 10 iterations (y-axis). The color scale ranges from 0.00 (dark purple) to 0.30 (yellow). The plot shows a sparse distribution of high probability values, with several bright yellow and green cells indicating higher values, particularly in the first few iterations and for particles 1, 2, and 5.
